# DENTURES

## Optimal Dentures

Highest quality Life-Like denture.

For patients who have worn traditional dentures, a new experience awaits. The OPTIMAL Denture is our most innovative denture made with a patented high-pressure heat injection technology and the best denture teeth available to doctors. This unique process creates dentures that fit every contour of your mouth and oral topography and are second-to-none. The dentures are also remarkably strong, lightweight, as well as odor and stain-resistant.

Our Acrylic holds its color throughout its life and does not fade to an orange color like other acrylics. Our Optimal or "Life-like" Denture utilizes the best denture teeth available for our optimal dentures which are the most esthetic and wear-resistant teeth available to dentists, denturists, and dental labs. Patients who select an Optimal Denture will enjoy a try-in preview, this allows you to see your new smile before it is completed.

Perio Scaling Root	\$290
Scaling and Planing 1-3 quad	\$290

**HYGIENE IS CURRENTLY NOT OFFERED AT THIS TIME**

Comprehensive dental care means looking at dental problems from all angles and coming up with the truly best solution

# GENERAL ANESTHESIA

A trip to the dentist's office to fill a cavity, get a crown or have a root canal usually involves a local anesthetic. The dentist will numb the affected area so the patient will have no feeling at the procedure site. For more complicated surgeries, such as ALL-On-X, Implants, and wisdom teeth removal, the patient may need more comfort. General anesthesia allows patients to sleep through their procedures. This helps patient comfort and overall experience. We work with Lifeguard Anesthesia who is a highly experienced group that travels to do general anesthesia in Dental and Medical offices.

First 15 minutes

\$309

Every Additional 15 minutes

\$206

## ALL - On - X

**All-On-X Is The Complete, Full-Mouth Solution For Missing Teeth or Failing Teeth which is performed while you are asleep in one visit!**

**In just one day you can change your life.** That's right, All-on-X is done in one day – you walk in with your old smile and leave the same day with a beautiful and functional new smile – An implant supported fixed bridge is the closest thing to natural teeth. Your smile and bite will be digitally designed for optimal fit, function and esthetics! A truly life changing replacement for natural teeth.
